

Special Issue on Climatology Research

Call for Papers

Climatology is the study of climate characteristics, the formation, distribution and evolution law. Climate affects the human production and all aspects of the life of human. Using of climate resources reasonably and preventing climate disasters effectively have become a important problem. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **climatology research**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **climatology research**. In this special issue, potential topics include, but are not limited to:

- Climate dynamics
- Climate impacts
- boundary layer climate
- Physical meteorology
- Air pollution meteorology
- Agricultural and forest meteorology
- Seasonal climate forecast
- Climate risk and vulnerability

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Climatology Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 9th, 2016
Publication Date	May 2016

Guest Editor:

Prof. **Shaocai Yu**, North Carolina State University, USA
