

Special Issue on Infectious Disease Epidemiology

Call for Papers

Infectious Disease Epidemiology is the study of the distribution, determinants and dynamics of infectious diseases in populations. It focuses on patterns of transmission, outbreak investigation, disease surveillance, risk factors and the impact of prevention and control strategies such as vaccination, antimicrobial use and public health interventions to reduce morbidity, mortality and the spread of infections.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Infectious Disease Epidemiology**. Potential topics include, but are not limited to:

- Emerging infectious disease epidemiology
- Disease surveillance and monitoring
- Outbreak investigation and response
- Transmission, evolution and control
- Mathematical and statistical modeling of infectious diseases
- Vaccination and immunization epidemiology
- Antimicrobial resistance epidemiology
- Zoonotic disease epidemiology
- HIV/AIDS epidemiology
- Hospital- and healthcare-associated infection epidemiology
- Molecular and genomic epidemiology
- Occupational and environmental epidemiology
- Climate-related infectious disease epidemiology
- Global health and infectious diseases
- Social and behavioral epidemiology of infectious diseases

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Infectious Disease Epidemiology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 30th, 2026
