

Table of Contents

Volume 13 Number 4

December 2023

Fourth-Order Predictive Modelling: I. General-Purpose Closed-Form Fourth-Order Moments-Constrained MaxEnt Distribution

D. G. Cacuci 413

Fourth-Order Predictive Modelling: II. 4th-BERRU-PM Methodology for Combining Measurements with Computations to Obtain Best-Estimate Results with Reduced Uncertainties

D. G. Cacuci 439

The Bivariate Normal Integral via Owen's T Function as a Modified Euler's Arctangent Series

J. Komelj 476

The Stability of the Gauss-Laguerre Rule for Cauchy P.V. Integrals on the Half Line

M. R. Capobianco, G. Criscuolo 505

An Efficient *Maple* Program for Calculating Adomian Polynomials

M. AL-Mazmumy 512

A Conceptual Model of Our Universe Derived from the Fine Structure Constant (α)

J. R. Crary 524

Stochastic Chaos of Exponential Oscillons and Pulsons

V. A. Miroshnikov 533

A Neighborhood Rough Set Attribute Reduction Method Based on Attribute Importance

P. Y. Su, F. Qin, F. Li 578

On Unitary N -Dilations for Tuples of Circulant Contractions and von Neumann's Inequality

J. M. Mouanda, E. J. M. Koubemba, D. Dehainsala 594

Analysis of the Impact of Optimal Solutions to the Transportation Problems for Variations in Cost Using Two Reliable Approaches

A. Rashid, Md. A. Islam 607

The Future of Quantum Computer Advantage

J. Chen 619

Computational Prooving of Riemann's Hypothesis

J. L. W. Tougma.....632

AI-Enhanced Performance Evaluation of Python, MATLAB, and Scilab for Solving Nonlinear Systems of Equations: A Comparative Study Using the Broyden Method

I. Azure, J. K. Wiredu, A. Musah, E. Akolgo644
