

## Special Issue on Supply and Operations Management

### Call for Papers

Operation management includes planning, organization, implementation and control of the operation process. It is the general term of various management work closely related to product manufacturing and service offers. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Supply and Operations Management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Supply and Operations Management**. Potential topics include, but are not limited to:

- Sustainable operations & supply chain management
- Logistics, transportation, distribution, and materials handling
- Production and inventory management
- Purchasing and sourcing management
- Operations planning, scheduling and control
- Human resource management for operations
- Information technology
- Strategy planning
- Behavioral operations management
- Service operations
- Risk management and resilience

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Supply and Operations Management**” should be selected during your submission.
