

Special Issue on
Industrial Economics and Sustainable Development
Call for Papers

Industrial Economics and Sustainable Development examines the relationship between industrial growth, economic transformation, and long-term environmental and social sustainability. This field addresses topics such as green industrialization, resource efficiency, clean energy transition, sustainable manufacturing, digital industrial innovation, and circular economic systems. It also explores industrial policy, technological advancement, environmental governance, climate adaptation, and sustainable infrastructure development. Increasing emphasis is placed on balancing economic competitiveness with ecological responsibility, promoting resilient industries, low-carbon production, and inclusive economic progress in response to global sustainability challenges.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Industrial Economics and Sustainable Development**. Potential topics include, but are not limited to:

- Green industrialization
- Circular economy systems
- Sustainable manufacturing technologies
- Industrial policy analysis
- Environmental economics
- Clean energy transition
- Resource efficiency management
- Low-carbon industrial development
- Sustainable supply chain management
- Smart industrial systems
- Industrial innovation and technology
