

Special Issue on Environment, Climate, Plant and Vegetation

Call for Papers

The study of Environment, Climate, Plant and Vegetation is important because these factors play a fundamental role in shaping ecosystems and determining the distribution, abundance, and diversity of species in different regions. Understanding the relationship between these factors can help us to better manage our natural resources and create policies that promote environmental sustainability and the health of our planet. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Environment, Climate, Plant and Vegetation**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Environment, Climate, Plant and Vegetation**. In this special issue, potential topics include, but are not limited to:

- Vegetation effects on weather and climate
- Vegetation effects on land use
- Effects of climate change on plant biodiversity
- Climate change responsible for global vegetation change
- Effect of environment on plant growth
- Plant–plant interactions and environmental change
- Vegetation dynamics
- Forest ecology
- Grassland ecology
- Wetland ecology
- Savanna ecology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Environment, Climate, Plant and Vegetation**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 17th, 2026
Publication Date	October 2026

Guest Editor:

Scientific Research
Open Access

**American Journal of
Plant Sciences**
ISSN Online: 2158-2750
