

Special Issue on Plant Biology

Call for Papers

The study of plants is vital because they underpin almost all animal life on Earth by generating a large proportion of the oxygen and food that provide humans and other organisms with aerobic respiration with the chemical energy they need to exist. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Plant Biology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Plant Biology**. In this special issue, potential topics include, but are not limited to:

- Plant biotechnology
- Cell biology
- Phytochemistry
- Molecular biology
- Plant genetics
- Plant insect interactions
- Plant stress biology
- Plant adaptations

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Plant Biology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 26th, 2026
Publication Date	February 2027
