**Volume 6    Number 5**

**May 2015**

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Distribution of Points of Interpolation and of Zeros of Exactly Maximally Convergent Multipoint Padé Approximants</b>                      |     |
| R. K. Kovacheva.....                                                                                                                          | 737 |
| <b>Modelling and Simulation of the Spread of HBV Disease with Infectious Latent</b>                                                           |     |
| I. A. Moneim, H. A. Khalil.....                                                                                                               | 745 |
| <b>On the Computation of Extinction Time for Some Nonlinear Parabolic Equations</b>                                                           |     |
| K. Ngarmadji, S. Ndeuzoumbet, H. Nkounkou, B. Mampassi.....                                                                                   | 754 |
| <b>Numerical Solution of Green's Function for Solving Inhomogeneous Boundary Value Problems with Trigonometric Functions by New Technique</b> |     |
| H. Safdari, Y. E. Aghdam.....                                                                                                                 | 764 |
| <b>Modified Logistic Maps for Cryptographic Application</b>                                                                                   |     |
| S. Etemadi Borujeni, M. S. Ehsani.....                                                                                                        | 773 |
| <b>Integral Representations for the Price of Vanilla Put Options on a Basket of Two-Dividend Paying Stocks</b>                                |     |
| S. E. Fadugba, C. R. Nwozo.....                                                                                                               | 783 |
| <b>Two and Three Dimensions of Generalized Thermoelastic Medium without Energy Dissipation under the Effect of Rotation</b>                   |     |
| M. A. Othman, S. Y. Atwa, A. W. Elwan.....                                                                                                    | 793 |
| <b>Blow up and Global Existence for a Nonlinear Viscoelastic Wave Equation with Strong Damping and Nonlinear Damping and Source terms</b>     |     |
| L. Guo, Z. Q. Yuan, G. G. Lin.....                                                                                                            | 806 |
| <b>Analytical Modeling of Vibration of Micropolar Plates</b>                                                                                  |     |
| L. Steinberg, R. Kvasov.....                                                                                                                  | 817 |
| <b>Approximate Technique for Solving Class of Fractional Variational Problems</b>                                                             |     |
| E. M. Solouma, M. M. Khader.....                                                                                                              | 837 |
| <b>Functional Weak Laws for the Weighted Mean Losses or Gains and Applications</b>                                                            |     |
| G. S. Lo, S. T. Sall, P. D. Mergane.....                                                                                                      | 847 |
| <b>Numerical Modelling and Simulation of Sand Dune Formation in an Incompressible Out-Flow</b>                                                |     |
| Y. M. Nouri, S. Bisso.....                                                                                                                    | 864 |
| <b>Effect of Rotation and Initial Magnetic Field in Fibre-Reinforced Anisotropic Elastic Media</b>                                            |     |
| F. S. Bayones.....                                                                                                                            | 877 |
