

Table of Contents

Volume 13 Number 2

February 2022

Highly Efficient Method for Solving Parabolic PDE with Nonlocal Boundary Conditions M. El-Gamel, G. I. El-Baghdady, M. A. El-Hady.....	101
A Statistical Analysis of Games with No Certain Nash Equilibrium Make Many Results Doubtful G. Klinkova, M. Grabinski.....	120
High-Order Iterative Methods Repeating Roots a Constructive Recapitulation I. Fried.....	131
Enclosing Ellipses by Folding Disks P. P. Klein.....	147
A Normal Weighted Inverse Gaussian Distribution for Skewed and Heavy-Tailed Data C. B. Maina, P. G. O. Weke, C. A. Ogutu, J. A. M. Ottieno.....	163
Function Projective Synchronization between Two Discrete-Time Hyperchaotic Systems Using Backstepping Method X. Li.....	178
Estimation of Distribution Function Based on Presmoothed Relative-Risk Function A. A. Abdushukurov, S. B. Bozorov, D. R. Mansurov.....	191
A Mathematical Model of COVID-19: Analysis and Identification of Parameters for Better Decision Making O. Diallo, Y. Kone, C. Sanogo, J. Pousin.....	205
Fixed Point Approximation for Suzuki Generalized Nonexpansive Mapping Using $B_{(\delta, \mu)}$ Condition K. Kumar, L. Rathour, M. K. Sharma, V. N. Mishra.....	215
Construction and Update of an Online Ensemble Score Involving Linear Discriminant Analysis and Logistic Regression B. Lalloué, J.-M. Monnez, E. Albuissou.....	228
