

TABLE OF CONTENTS

Volume 2 Number 3

September 2013

Study on Quantitative Model of Karst Drainage Basin Water-Holding Based on Principal Component Analysis: A Case Study of Guizhou, China

Z. H. He, X. X. Chen, H. Liang, F. S. Huang, F. Zhao.....205

On the Use of Landsat-5 TM Satellite for Assimilating Water Temperature Observations in 3D Hydrodynamic Model of Small Inland Reservoir in Midwestern US

M. Babbar-Sebens, L. Li, K. Song, S. S. Xie.....214

Remote Sensing Applications: Beyond Land-Use and Land-Cover Change

C. W. Baynard.....228

Application of Multi-Frequency SAR Images for Knowledge Acquisition

V. Battsengel, D. Amarsaikhan, A. Munkh-Erdene, Ch. Bolorchuluun, Ch. Narantsetseg.....242

Towards an Intelligent Predictive Model for Analyzing Spatio-Temporal Satellite Image Based on Hidden Markov Chain

H. Essid, I. R. Farah, V. Barra.....247

Irrigation Scheduling Using Remote Sensing Data Assimilation Approach

B. Kamble, A. Irmak, K. Hubbard, P. Gowda.....258

Determining the Best Optimum Time for Predicting Sugarcane Yield Using Hyper-Temporal Satellite Imagery

S. Mutanga, C. van Schoor, P. L. Olorunju, T. Gonah, A. Ramoelo.....269

Monitoring and Change Detection along the Eastern Side of Qena Bend, Nile Valley, Egypt Using GIS and Remote Sensing

A. O. A. El-Aziz.....276
