

## Special Issue on Crop Physiology and Agriculture

### Call for Papers

Crop physiology focus on improving performance and reducing pollution of cropping systems for food, feed and biofuel production through an understanding of crop physiology, plant genetics and crop management.. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Crop Physiology and Agriculture**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Crop Physiology and Agriculture**. In this special issue, potential topics include, but are not limited to:

- Crop responses to environment
- Metabolism of crops
- Physiological processes of crops
- Crop nutrient absorption
- Crop yield & quality
- Crop physiology: applications for breeding and agronomy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Crop Physiology and Agriculture**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 3th, 2026
Publication Date	August 2026
