

Special Issue on Medical Education and Health Education

Call for Papers

Medical education is education related to the practice of being a medical practitioner; either the initial training to become a physician, or additional training thereafter. Various teaching methodologies have been utilized in medical education, which is an active area of educational research. Health education is a profession of educating people about health. Individuals and groups of people learn to behave in a manner conducive to the promotion, maintenance, or restoration of health.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Medical Education and Health Education**. Potential topics include, but are not limited to:

- Medical training and clinical practice
- Skills improvement
- Innovative approaches and technologies
- Mental health and behaviors
- Curriculum development
- Medical education and healthcare systems
- Patient education and health improvement
- Health knowledge, awareness and healthy behaviors
- Education for healthcare and nursing
- Health education and public health
- Nutrition education
- Education for health and well-being

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Medical Education and Health Education**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 17th, 2021
Publication Date	July 2021
