

Special Issue on Mechanical Engineering

Call for Papers

Mechanical engineering, the branch of engineering concerned with the design, manufacture, installation, and operation of engines and machines and with manufacturing processes. It is particularly concerned with forces and motion. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **mechanical engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **mechanical engineering**. In this special issue, potential topics include, but are not limited to:

- Machinery manufacturing and automation
- Mechatronic engineering
- Thermal engineering
- Robotics and automation
- Design and manufacturing
- Mechatronics engineering
- Power plant engineering
- Mechanical design and theory
- Mechanical dynamics
- Mechanical reliability
- Mechanical engineering and artificial intelligence

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Mechanical Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 18th, 2026
Publication Date	October 2026

Guest Editor:

Dr. Pacifique Turabimana, Kumoh National Institute of Technology, Korea.
