

Special Issue on Energy Economy

Call for Papers

The world energy economy has the largest influence on the decisions that people and governments make. Current global consumption rates are depleting the planets ability to sustain our way of life. Increased demand means increased prices in every sector of the world economy. Many alternative energy companies are creating new economies in order to facilitate a more sustainable enegy market. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **energy economy**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **energy economy**. In this special issue, potential topics include, but are not limited to:

- Exploitation, conversion and use of energy
- Markets for energy commodities and derivatives
- Experiments, surveys of energy economy
- Analytical models of analytical models
- Optimization models of analytical models
- Elasticity of supply and demand in energy market
- Energy and economic growth

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Energy Economy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 5th, 2026
Publication Date	October 2026
