

Special Issue on Geography and Environment

Call for Papers

Geography is the study of places, landscapes and human-environment interactions. Geographers address important questions concerning environmental change, economic development, globalization, human population growth, migration, land-use change, and geopolitics. Geographers also develop sophisticated technological tools to examine Earth's diverse landscapes and environments.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Geography and Environment**. Potential topics include, but are not limited to:

- Geography development and human impact
- Geoengineering and geographical technologies
- Geomorphology analysis
- Natural disasters and environmental change
- Biogeography, natural resources and conservation
- Natural environment, human activities and systems
- Spatial analysis and information technology
- Management and economic policy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Geography and Environment**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 25th, 2018
Publication Date	December 2018
