

Special Issue on Environmental Information Systems

Call for Papers

The Sustainable Environmental Management Information System is designed to identify and promote the progress of sustainable environmental management. The system utilizes the Environmental Impact Information System to collect and process data on environmental impact. The collected data are processed and analyzed to identify Eco Balance; draw up environmental action plans; support decision-making in sustainable environmental management; promote environmentally-friendly design; improve activities by each division; and disclose information to the public. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Information Systems**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Information Systems**. In this special issue, potential topics include, but are not limited to:

- Environmental Information Management database
- Environmental monitoring
- Mapping and environment
- Composition of the environmental management information system
- Environmental information systems strategy
- Environmental management and information systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Environmental Information Systems**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 26th, 2020
Publication Date	February 2021
