## Special Issue on Social Science and Health

### Call for Papers

Social Science and Health explores how social, economic, cultural and environmental factors shape health outcomes, health behaviors, and healthcare systems. This field integrates insights from sociology, psychology, economics, anthropology, and public health to examine issues such as health disparities, social determinants of disease, access to care, community influences and policy impacts. Its goal is to understand and improve population health by addressing the broader social contexts that influence well-being.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Social Science and Health**. Potential topics include, but are not limited to:

- Medical sociology
- Social determinants of health
- Public health and preventive medicine
- Social factors, interventions and health outcomes
- Health economics and socioeconomic factors
- Global and public health policy
- Health politics
- Social epidemiology
- Health, behavior and society
- Health psychology and mental care
- Social determinants of chronic disease
- Health communication and healthy behaviors
- Health education and promotion
- Gender and health studies
- Global health and development
- Health disparities
- Community health promotion
- Health services research
- Medical ethics
- Cultural and anthropological approaches to health

**Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).**

---

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Social Science and Health**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 26th, 2026
Publication Date	May 2026

Health Editorial Office
