Volume 9 Number 3

September 2019

N-Body Simulations of Gas-Free Disc Galaxies with SMBH Seed in Binary Systems

R. Chan.....173

The Analysis of Interplanetary Shocks Associated with Six Major Geo-Effective Coronal Mass Ejections during Solar Cycle 24

S. L. Soni, P. R. Singh, B. Nigam, R. S. Gupta, P. K. Shrivastava.....191

Re-Entry of Space Objects from Low Eccentricity Orbits

C. S. Lawrence, R. K. Sharma.....200

Analytical Solution for Formation Flying Problem near Equatorial-Circular Reference Orbit

S. A. Altalhi, M. I. El Saftawy.....217

The Distance Modulus in Dark Energy and Cardassian Cosmologies via the Hypergeometric Function

L. Zaninetti.....231

Gamma-Ray Bursts Generated by Hyper-Accreting Kerr Black Hole

F. Sado.....247

Gravity Constraints on the Measurements of the Speed of Light

F. Ramdani.....265

Halo Orbits in the Photo-Gravitational Restricted Three-Body Problem

S. Ghotekar, R. K. Sharma.....274

Convective Models of Jupiter's Zonal Jets with Realistic and Hyper-Energetic Excitation Source

H. G. Mayr, K. L. Chan.....292

Models for Velocity Decrease in HH34

L. Zaninetti.....302

Optical Spectroscopic Monitoring Observations of a T Tauri Star V409 Tau

H. Akimoto, Y. Itoh.....321

Parameter Inversions of Multi-Layer Media of Mars Polar Region with Validation of SHARAD Data

C. Liu, Y.-Q. Jin.....335
