

TABLE OF CONTENTS

Volume 5 Number 2

February 2012

Role of Cross Layer Based Intrusion Detection System for Wireless Domain

R. Kaur.....81

A Low Energy Uneven Cluster Protocol Design for Wireless Sensor Network

Y. Liu, S. Zhong, L. C. You, B. Lv, L. Du.....86

Increasing Throughput and Reducing Delay in Wireless Sensor Networks Using Interference Alignment

V. Zibakalam, M. HosseinKahaei.....90

Spray and Dynamic: Advanced Routing in Delay Tolerant Networks

El M. Sammou.....98

Research on User Permission Isolation for Multi-Users Service-Oriented Program

L. Yu, J. Wei, L. Li, Z. Jing, L. Peng, Y. X. Lai, S. P. Bu.....105

Optimal Allocation of Radio Resource in Cellular LTE Downlink Based on Truncated Dynamic Programming under Uncertainty

A. M. Ajofoyinbo, K. O. Orolu.....111

MIMO Spectral Efficiency over Energy Consumption Requirements: Application to WSNs

M. Ben Zid, K. Raoof, A. Bouallègue.....121

Developing Fault-Tolerant Heuristic Routing Algorithm Using Ant Colonies in Mesh Networks

A. Soleimany, S. Lotfi, A. S. Shafigh, H. Mohammadzadeh.....130

The figure on the front cover is from the article published in *Int. J. Communications, Network and System*, 2012, Vol. 5, No. 2, pp. 90-97 by Vahid Zibakalam and Mohammad HosseinKahaei.
