## Special Issue on Wireless & Mobile Networks

### Call for Papers

Wireless & Mobile Networks studies the design, implementation and optimization of communication systems that enable wireless data transmission and mobile connectivity. It covers technologies such as cellular networks, Wi-Fi, 5G/6G systems, and ad hoc networks. The field focuses on improving network performance, reliability, security and mobility to support applications like mobile internet, IoT, and real-time communication across diverse environments.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Wireless & Mobile Networks**. Potential topics include, but are not limited to:

- Cellular Network Systems (4G/5G/6G)
- Wireless Sensor Networks
- Mobile Ad Hoc Networks
- Internet of Things Networking
- Network Security and Privacy in Wireless Systems
- Mobile Edge and Cloud Computing
- Wireless Communication Theory
- Network Protocols and Architecture
- Quality of Service and Network Performance Optimization
- Green Communications and Energy-Efficient Networking
- Heterogeneous Networks and Small Cells
- Spectrum Management and Cognitive Radio

**Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).**

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Wireless & Mobile Networks**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 20th, 2026
