**Volume 14    Number 8**

**August 2023**

|                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Contamination, Precision and Accuracy of pXRF Geochemistry: Case Study-Polymetals Resources Ltd., Mansala Gold Project, Siguiri Basin, Northeast Guinea</b> |     |
| N. Y. Asante .....                                                                                                                                             | 677 |
| <b>Cycle Time Analysis of Open Pit Mining Dump Trucks</b>                                                                                                      |     |
| B. Enkhchuluun, B.-O. Batgerel, C. Ping .....                                                                                                                  | 689 |
| <b>Identification of Mine Water Inrush Source Based on PCA-BP Neural Network</b>                                                                               |     |
| M. C. Ning, H. F. Lu.....                                                                                                                                      | 710 |
| <b>Groundwater Potential Mapping in Lapan Gwari Community Using Integrated Remote Sensing and Electrical Resistivity Soundings</b>                             |     |
| A. D. Mangs, J. S. Ejepu, C. C. Nkemkah, S. N. Yusuf, A. K. Sallau, J. A. Yakubu, Y. Ibrahim, W. M. Wakili .....                                               | 719 |
| <b>Petrography, Geochemistry and Relative Chronology of Quaternary Volcanic Formations in the Mermoz and Fann Sectors, West Senegal</b>                        |     |
| M. Fall, I. Labou, P. M. Ndiaye .....                                                                                                                          | 733 |
| <b>Transmission Line Modelling of Geomagnetic Induction in the Ocean/Earth Conductivity Structure</b>                                                          |     |
| D. H. Boteler, S. Chakraborty, X. Shi, M. D. Hartinger, X. Wang.....                                                                                           | 767 |
| <b>Characterization of Sandstone Reservoir at Bokor Formation, Kampot Province, Kampong Som Basin, Onshore Cambodia</b>                                        |     |
| V. Oeur, C. Or, C. Eng, S. Pech, L. Thorng, S. Sio, R. Heng .....                                                                                              | 792 |
