

Special Issue on Petroleum Engineering

Call for Papers

Petroleum Engineering involves the study and application of engineering principles and techniques to explore, extract, and produce oil and gas resources. It involves a wide range of activities, from reservoir characterization and drilling to production optimization and refining processes. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Petroleum Engineering**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Petroleum Engineering**. In this special issue, potential topics include, but are not limited to:

- Petroleum geostatistics
- Petroleum geology
- Well drilling technology
- Enhanced oil recovery
- Evaluate potential oil and gas reservoirs
- Oversee drilling activities
- Design surface collection and treatment facilities
- Petroleum economics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Petroleum Engineering**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 13th, 2026
Publication Date	October 2026

Guest Editor:

Prof. S.V. Parshin, Ural Federal University Ekaterinburg, Russia.
