

Special Issue on Head & Neck Surgery

Call for Papers

Head & Neck Surgery is a medical specialty focused on the surgical treatment of conditions affecting the head and neck region, including the throat, larynx, thyroid, salivary glands and facial structures. It addresses benign and malignant diseases, trauma and functional disorders. The field integrates oncology, reconstructive techniques and minimally invasive procedures to restore function, appearance and quality of life while ensuring safe and effective patient care.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Head & Neck Surgery**. Potential topics include, but are not limited to:

- Otology and neurotology
- Rhinology and sinus surgery
- Maxillofacial trauma
- Craniofacial surgery
- Facial plastic surgery
- Reconstructive head and neck surgery
- Minimally invasive techniques
- Robotic surgery
- Oncologic surgery
- Skull base surgery
- Laryngology and voice disorders
- Sleep surgery
- Salivary gland surgery
- Thyroid and parathyroid surgery
- Pediatric head and neck surgery
- Head and neck oncology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Head & Neck Surgery**” should be chosen during your submission.
