

Table of Contents

Volume 10 Number 5

May 2022

^{181}Ta Nuclei NMR Calculation in Ternary A_3BC_4 Semiconductor	
C. Xu, C. L. Shi.....	1403
Propagation Characteristics of Flexural Wave in One-Dimensional Phononic Crystals Based on Lattice Dynamics Model	
H. Wu, Y. D. Kuang.....	1416
Nonlinear Finite Element Analysis of Thin-Walled Beam on Pre- and Post-Buckling Stiffness and Gauge Sensitivity Index	
S. Y. Zhang.....	1432
Nonlocal Theory of the Photon Gas Evolution Beginning from the Planck Time	
B. V. Alexeev.....	1443
On the Transition from Newtonian Gravity to General Relativity	
F. Blume.....	1461
Widened R^n General Relativity	
A. Strumia.....	1477
Effect of the Relative Position with Gaussian Beam Center and Droplet Center on Optical Caustics	
Y. T. Hao.....	1495
Mechanical Analysis of Interface in Coating Structure under Conical Concave Indenter with FEM	
S.-Q. Huang, P.-J. Tang, W.-H. Zhang.....	1509
Meaningful Contact Estimates among Children in a Childcare Centre with Applications to Contact Matrices in Infectious Disease Modelling	
D. Flynn-Primrose, N. Hoover, Z. Mohammadi, A. Hung, J. Lee, M. Tomovici, E. W. Thommes, D. Neame, M. G. Cojocaru.....	1525
Evacuation Vector Field in Crowd Dynamics	
L. W. Zhou.....	1547
Formally Deriving the Third Newton's Law from a Pair of Nontrivial Assumptions in a Formal Axiomatic Theory "Sigma-V"	
V. O. Lobovikov.....	1561

Quantitative Simulation Study of Metal Additive Manufacturing by Kinetic Monte Carlo	
K. Ouyang, Y. D. Kuang.....	1587
Generalized Harmonic Numbers $H_{n,k,r}(\alpha, \beta)$ with Combinatorial Sequences	
R. Wang, Wuyungaowa.....	1602
Lagrangian Relaxation Method for Multiobjective Optimization Methods: Solution Approaches	
H. S. F. Alam.....	1619
Positive Solution for a Hadamard Fractional Singular Boundary Value Problem of Order $\mu \in (2, 3)$	
N. A. Asif.....	1631
An Evaluation Model of Graduation Thesis Results Based on Triangular Fuzzy Number	
H. X. Yang, J. J. Yin, A. L. Wang.....	1642
The Family of Global Attractors of Coupled Kirchhoff Equations	
G. G. Lin, F. M. Chen.....	1651
Canard Solutions in a Predator-Prey Model	
G. J. Lin.....	1678
Single Wall Carbon Nanotubes (SWCNTs) as (<i>i</i>) Type in the Photovoltaic Cell of Nano-Dimensions	
M. Ishtaiwi, M. Hajjyahya, K. Abd-Haqq, M. Bashar.....	1694
On Maps Preserving the Spectrum on Positive Cones of Operator Algebras	
Z. Q. Dang.....	1702
Dirac Quantum Beats in Extreme Relativistic Diffraction in Time	
S. Godoy.....	1711
High Efficiency Asymmetric Transmission of Linearly Polarized Waves through a Three-Layered Chiral Metamaterial	
W. J. Zheng.....	1721
Legendre Polynomial Kernel: Application in SVM	
H. Rebei, N. S. H. Alharbi.....	1732
The Mathematical Model of Short-Term Forest Fire Spread	
S. B. Chiu, Y. Li, J. Y. Zhao.....	1748
A Cluster Expansion Free Method for Computing Higher Derivatives of the Free Energy and Estimating the Error between the Finite and Infinite Volume Free Energy	
A. Lo.....	1762

Golden Quartic Polynomial and Moebius-Ball Electron

H. H. Otto.....1785

Nuclear Fusion Research and Development Need New Relativistic Mass and Energy Corrections Given by the Information Relativity Theory

H. H. Otto.....1813

Equivalence of Paths under the Action of the Real Representation of $Sp(n)$

M. K. Khodyrovich, J. S. Solyjonovich.....1837
