

Special Issue on Drug Therapy and Disease Control

Call for Papers

Drug Therapy and Disease Control covers the development, application, evaluation, and optimization of pharmacological interventions for the prevention, treatment, and management of diseases. Key areas include drug discovery and development, pharmacotherapy, antimicrobial therapy, antiviral and antiparasitic treatments, oncology therapeutics, cardiovascular and metabolic disease management, immunotherapy, personalized medicine, drug safety, pharmacovigilance, drug resistance, and therapeutic efficacy. The field also considers evidence-based treatment strategies, medication adherence, drug interactions, clinical outcomes, and the integration of pharmacological approaches with public health measures to improve disease prevention, disease control, and patient care.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Drug Therapy and Disease Control**. Potential topics include, but are not limited to:

- Pharmacotherapy
- Drug development
- Antimicrobial therapy
- Antiviral therapy
- Antiparasitic therapy
- Anticancer therapy
- Immunotherapy
- Cardiovascular therapeutics
- Metabolic disease therapy
- Neurological therapeutics
- Infectious disease control
- Drug resistance
- Pharmacovigilance
- Personalized medicine
- Therapeutic drug monitoring
- Medication adherence

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Drug Therapy and Disease Control**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 10th, 2026
Publication Date	February 2027
