
Special Issue on

Computer, Network and Information Security

Call for Papers

Computer, Network and Information Security is an interdisciplinary field focused on protecting computer systems, networks, digital infrastructure, and information from unauthorized access, attacks and other security threats. It covers cybersecurity, cryptography, network protection, secure software and systems, authentication, privacy, intrusion detection, digital forensics and risk management. The field also explores emerging security challenges associated with cloud computing, mobile systems, the Internet of Things and artificial intelligence.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Computer, Network and Information Security**. Potential topics include, but are not limited to:

- Network Security and Defense
- Cybersecurity and Threat Intelligence
- Cryptography and Cryptographic Protocols
- Information Security and Privacy
- Secure Software Engineering
- Application and Web Security
- Cloud Computing Security
- Internet of Things Security
- Mobile and Wireless Security
- Authentication and Access Control
