

## Special Issue on Advances in Lymphoma Research

### Call for Papers

**Lymphoma** is the most common form of hematological malignancy or "blood cancer" in the developed world. It is a group of blood cell tumors that develop from lymphocytes and has two types: Hodgkin lymphoma (HL) and non-Hodgkin lymphoma (NHL). Lymphadenopathy or swelling of lymph nodes is the primary presentation in lymphoma. Treatments involve chemotherapy, radiation therapy and surgery. As **lymphoma** has caused numerous deaths and become a big threaten to our health, further study shows significant importance and necessity.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **advances in lymphoma research**. Potential topics include, but are not limited to:

- Signs and symptoms
- Prognosis and diagnosis
- Stage of lymphoma
- Treatment of lymphoma
- Epidemiology of lymphoma
- Lymphoma in animals
- Limitation and problem

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue - Advances in Lymphoma Research**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 5th, 2014
Publication Date	January 2015

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Journal of Cancer Therapy**

**ISSN Online: 2151-1942**
