

Special Issue on Prostate Cancer Research

Call for Papers

Prostate cancer is a form of cancer that develops in the prostate, a gland in the male reproductive system. Most prostate cancers are slow growing; however, there are cases of aggressive prostate cancers. The cancer cells may metastasize (spread) from the prostate to other parts of the body, particularly the bones and lymph nodes. Prostate cancer may cause pain, difficulty in urinating, problems during sexual intercourse, or erectile dysfunction. Other symptoms can potentially develop during later stages of the disease.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **prostate cancer research**. Potential topics include, but are not limited to:

- Signs and symptoms
- Pathophysiology
- Prevention and management
- Male disease
- Men's health

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Prostate Cancer Research**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	April 22nd, 2015
Publication Date	June 2015

Guest Editor:

Scientific Research
Open Access

Journal of Cancer Therapy

ISSN Online: 2151-1942
