

Special Issue on Brain Tumor

Call for Papers

Brain tumor is the growth of abnormal cells in the tissues of the brain, which includes malignant tumors and benign tumors. It can be the primary tumor that starts within the brain and secondary tumor that has spread from somewhere else, known as brain metastasis tumor. Most common symptoms include headaches, nausea and vomiting, changes in the ability to talk, hear, or see, problems with balance, thinking or memory, Seizures and so on.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Brain Tumor**. Potential topics include, but are not limited to:

- Meningioma
- Neurofibromatosis
- Astrocytoma
- Glioblastoma
- Gliomas
- Schwannoma
- Brain MRI
- Pituitary tumors

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Brain Tumor**” should be selected during your submission.

Special Issue Timetable:
