

Special Issue on
Pollution Control and Environmental Recovery
Call for Papers

Pollution Control and Environmental Recovery examines the strategies, technologies, and scientific approaches used to reduce environmental pollution and restore damaged ecosystems. This field covers air, water, and soil pollution management, waste treatment, ecological remediation, sustainable resource utilization, and environmental monitoring. It also explores innovative methods for controlling industrial emissions, managing hazardous substances, improving environmental quality, and promoting ecological sustainability. The subject plays an important role in supporting environmental protection, public health, and long-term sustainable development in both urban and natural environments.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Pollution Control and Environmental Recovery**. Potential topics include, but are not limited to:

- Air pollution control
- Water pollution treatment
- Soil contamination remediation
- Waste management technologies
- Environmental toxicology
- Ecological restoration
- Industrial emission reduction
- Hazardous waste disposal
- Sustainable resource recovery
- Environmental monitoring
- Pollution prevention strategies
- Wastewater treatment systems
- Climate change mitigation
- Green environmental technologies
- Ecosystem conservation
- Environmental risk assessment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Pollution Control and Environmental Recovery**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 10th, 2026
Publication Date	November 2026

Guest Editor:

Dr. Anthony Phiri

Environmental Management, Renewable Energy and Climate Change Center
Harare Institute of Technology, Zimbabwe
