

Special Issue on Environmental Monitoring and Analysis

Call for Papers

Environmental Monitoring and Analysis is a scientific field dedicated to assessing environmental conditions, detecting pollutants, and evaluating changes in natural ecosystems through systematic observation, sampling, and data interpretation. It incorporates techniques for monitoring air and water quality, soil contamination, biodiversity, climate variables, and hazardous substances, supported by analytical chemistry, remote sensing, geographic information systems, and advanced sensor technologies. Research in this area helps identify pollution sources, assess environmental risks, evaluate the effectiveness of control measures, and support compliance with environmental regulations. By integrating scientific measurements with data-driven assessment, this field provides essential evidence for environmental protection, resource management, pollution prevention, and sustainable development.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Monitoring and Analysis**. Potential topics include, but are not limited to:

- Air quality monitoring
- Water quality analysis
- Soil contamination assessment
- Environmental sampling methods
- Pollution source identification
- Environmental analytical chemistry
- Remote sensing applications
- Geographic information systems
- Ecological monitoring
- Biodiversity assessment
- Noise pollution monitoring
- Wastewater analysis
- Heavy metal detection
- Environmental risk assessment
- Climate monitoring
- Environmental data analysis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Environmental Monitoring and Analysis***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 28th, 2027
Publication Date	March 2027
