Special Issue on Spatial Analysis and Integration

Call for Papers

Spatial analysis is a kind of geographic analysis, which attempts to use mathematics and geometry to explain human behavior patterns and their spatial expressions. Spatial analysis is one of the main signs that distinguish GIS from general information systems, CAD or electronic map systems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Spatial Analysis and Integration.**

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Spatial Analysis and Integration**. Potential topics include, but are not limited to:

- Spatial Statistics
- Spatial characterization
- Spatial algorithms
- Spatial relationship
- Spatial position
- Geoinformation
- Methods of spatial analysis
- Spatial data integration
- Simulation and modeling
- Applications

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Spatial Analysis and Integration***" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 26th, 2021
Publication Date	June 2021
