

Table of Contents

Volume 3 Number 4

October 2017

Reconsidering “Does the Sum Rule Hold at the Big Bang?” with Pre Planckian HUP, and Division Algebras

A. W. Beckwith.....539

Variation in Gravity Due to Laser Inducing an Explosion—Comparison with the Spinning Barbell Driven by Lasers

A. Beckwith.....558

Geometrical Interpretation of Time and New Models of the Space-Time

O. A. Olkhov.....564

Density of Vacuum-Like Plasma and Hubble Constant

I. A. Obukhov.....572

Checking the Alleged “Incompatibility of the Relic Dark Energy Hypothesis” with Physically Admissible Solutions to the Cosmic Ray Problem of Doubly Special Relativity

A. W. Beckwith.....588

New Interpretation of Newton’s Law of Universal Gravitation

D. L. Milanese.....600

Could Gravitons from a Prior Universe Survive a (LQG Inspired) “Quantum Bounce” to Re-Appear in Our Present Universe?

A. W. Beckwith.....624

The Planck Length and the Constancy of the Speed of Light in Five Dimensional Spacetime Parametrized with Two Time Coordinates

C. Köhn.....635

Gedanken Experiment for B Field Contributions to Initial Conditions for Relic Graviton Production Based upon an Initial Inflaton Value

A. W. Beckwith.....651

Upper Bound in Change in Initial Value for “Time Component” of Pre Planckian Metric Tensor, for a Cosmological “Constant” Universe

A. W. Beckwith.....657

Theory of Electromagnetism and Gravity

G. Poole.....663

Pre-Octonionic to Octonionic Gravity and Could Kinetic Energy Be Larger than Potential Energy before Inflation?

A. W. Beckwith.....693

Modified $f(R)$ Gravity and Thermodynamics of Time-Dependent Wormholes at Event Horizon

H. Saiedi.....708

Newtonian Quantum Gravity

J. G. A. Corona.....715

The Transition from Pre-Octonionic to Octonionic Gravity and How It May Be Pertinent to a Re-Do of the HUP for Metric Tensors

A. W. Beckwith.....727

Using Barbour's Ephemeris Time, and Padmanabhan's Inflaton Value, plus Will's Massive Graviton Velocity to Isolate Rest Energy of Massive Graviton as Compared to Racetrack Inflation Results of Graviton Physics and Modified Wheeler de Witt Results of Wormhole Physics

A. W. Beckwith.....754

Astrophysics: Macroobject Shell Model

V. S. Netchitailo.....776

New Dark Matter Generation Mechanism and Its Implications for the Cosmological Background

H. Defloor.....791

Classical and Relativistic Models for Time Duration of Gamma-Ray Bursts

L. Zaninetti.....808

The Universe at Lattice-Fields

G. Guido, G. Filippelli.....828
