

Table of Contents

Volume 6 Number 4

October 2020

A New Theory on Electron Wave-Particle Duality

N. Butto.....567

A New Theory on the Origin and Nature of the Fine Structure Constant

N. Butto.....579

Interesting QFT Problems Tackled in New Fashion

A. Plastino, M. C. Rocc.....590

A Theory of Our Universe

R. M. L. Baker Jr.....609

Analytical Soliton-Like Solutions to Nonlinear Dirac Equation of Spinor Field in Spherical Symmetric Metric

J. Edou, V. I. S. Hontinfinde, A. Adomou, S. Massou.....623

A Solution to the Cosmological Constant Problem in Two Time Dimensions

C. Köhn.....640

An Ultralocal Classical and Quantum Gravity Theory

J. R. Klauder.....656

The Essence and Origin of the Magnetic Constant

N. Butto.....663

Energy Conditions in Palatini Approach to Modified $f(R)$ Gravity

H. Saiedi.....671

The Relation between Thermodynamics and Gravitational Constant (G)

A. K. Abou Layla.....680

We Begin with a “Trivial” Condition on Massive Gravitons, and Use That to Examine Nonsingular Starts to Inflation, for GW, with GW Strength and Possible Polarization States?

A. W. Beckwith.....692

Hypersphere World-Universe Model: Basic Ideas

V. S. Netchitailo.....710

The Quantum Bang Hypothesis: An Alternative to Dark Matter and Dark Energy

P. G. Tonin.....753

Two Strong Simple Proofs That All Doppler Shifts (including the Axial) Impact Observed Time, and All the Transverse Does

S. L. Reich.....765

The Electromagnetic Particle—A Backward Engineering Approach to Matter in SI Units

T. Bartusch.....774

Using Affine Quantization to Analyze Non-Renormalizable Scalar Fields and the Quantization of Einstein's Gravity

J. R. Klauder.....802

The Many Faces of Gravity

R. Sadykov.....817

The Favored Classical Variables to Promote to Quantum Operators

J. R. Klauder.....828
