Editor-in-Chief

Prof. Christian Corda

Section of Physics of Santa Rita, School of Advanced
Academic Studies and Research, Italy

Editorial Board

Prof. Mohamed Assaad Abdel-Raouf

Physics Department, Faculty of Science, Ain Shams University, Egypt
Fukushima University, Japan

Dr. Kazuharu Bamba

Dr. Andrew Beckwith

Department of Physics, PRC (Visiting Scholar) Chongqing University,
USA

Prof. Elmo Benedetto

Dr. Alexander Burinskii

Department of Computer Science, University of Salerno, Italy
Laboratory of Theoretical Physics in Nuclear Safety, Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Prof. Octavio José Obregón Díaz

Dr. Luca Fabbri

Dr. Maria Emília Xavier Guimarães

Dr. Seyed Hossein Hendi

Dr. Huda E. Khalid

Prof. Maria Paola Lombardo

Dr. Lino Miramonti

Dr. Hooman Moradpour

Azərbaycan Şahid Mədanı University, Iran

Universidad de Guanajuato, Mexico

University of Bologna, Italy

Instituto de Física, Universidade Federal Fluminense, Brazil

Shiraz University, Iran

Mosul University, Iraq

Istituto Nazionale di Fisica Nucleare, Italy

Università degli Studi di Milano, Italy

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jean Perron

Department of Applied Sciences (DSA), University of Québec in
Chicoutimi, Canada

Prof. Christopher Pilot

Prof. Waldyr A. Rodrigues Jr.

Gonzaga University, Spokane, WA, USA

Institute of Mathematics, Statistics and Scientific Computation, State
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero

Prof. Jafar Sadeghi

Dr. Burra Gautam Sidharth

DISAT, Polytechnic University of Turin, Italy

University of Mazandaran, Iran

International Institute of Applicable Mathematics & Information
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar

Dr. Lorenzo Zaninetti

Intel Corporation, USA

Department of Physics, Italy

Table of Contents

Volume 11 Number 1

January 2025

Fermions: Dirac Internal Exchange Frequencies

D. Kwiat..... 1

General Maxwell Theory of Fields

Y. G. Feng..... 8

The Origin of Rings

M. Linick 19

On the Occurrence of Different Classes of Solar Flares during the Solar Cycles 23 and 24

L. W. Sanon, W. O. Compaoré, S. Koala, J. L. Zerbo..... 28

A Dark Energy Hypothesis III

J. Togeas 39

A Dark Energy Hypothesis IV

J. Togeas 45

A Dark Energy Hypothesis V

J. Togeas 56

A New Paradigm in Quantum Fields: The Quantum Oscillator with Semi-Quanta (IQuO) (Part One)

G. Guido 61

3D Quantum Gravity, Localization and Particles beyond Standard Model

R. Raitio 96

Sun-Related Energy, Induced Ring, Auroral Electrojet and Magnetopause Currents Variability during Solar Cycles 23 and 24

I. Ki, M. Kaboré, S. Koala, J. L. Zerbo 110

The Contradictions between the Total-Entropy and the Gibbs Energy When Applied to the Evolving Path and State of Equilibrium of Thermodynamically-Reversible Chemical Reactions

J. C. Íñiguez 120

A New Paradigm in Quantum Fields: The Quantum Oscillator with Semi-Quanta (IQuO) (Part Two)

G. Guido 138

**Erratum to “Data from Twenty-Three FRB’s Confirm the Universe is Static
and Not Expanding”, [Journal of High Energy Physics, Gravitation
and Cosmology 2024, 10, 1152-1177]**

L. E. Ashmore 165

Time Definition Using the Extrinsic Universe: Expanding the Big Bang Theory

Y. N. Silva 168

The Theory of the Extended Electron (Anti-Particles of Dirac and Majorana)

H. van Nguyen 183

Journal of High Energy Physics, Gravitation and Cosmology

ISSN Print: 2380-4327 ISSN Online: 2380-4335

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
