Editor-in-Chief

Prof. Christian Corda

SUNY Polytechnic Institute, Italy

Editorial Board

Prof. Mohamed Assaad Abdel-Raouf

Ain Shams University, Egypt

Dr. Kazuharu Bamba

Fukushima University, Japan

Prof. Elmo Benedetto

University of Salerno, Italy

Prof. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety, Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Azarbaijan Shahid Madani University, Iran

Prof. Octavio José Obregón Díaz

Universidad de Guanajuato, Mexico

Prof. Shihai Dong

Instituto Politécnico Nacional, Mexico

Dr. Luca Fabbri

University of Genova, Italy

Dr. Maria Emília Xavier Guimarães

Fluminense Federal University, Brazil

Prof. Seyed Hossein Hendi

Shiraz University, Iran

Dr. Huda E. Khalid

Telafer University, Iraq

Prof. Maria Paola Lombardo

Istituto Nazionale di Fisica Nucleare, Italy

Prof. Lino Miramonti

Università degli Studi di Milano, Italy

Dr. Hooman Moradpour

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jean Perron

University of Québec in Chicoutimi, Canada

Prof. Christopher Pilot

Gonzaga University, USA

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation, State
University of Campinas (UNICAMP), Brazil

Dr. Matteo Luca Ruggiero

Università degli Studi di Torino, Italy

Prof. Jafar Sadeghi

University of Mazandaran, Iran

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathemaics & Information
Sciences, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Andrew Walcott Beckwith

Chongqing University, China

Dr. Lorenzo Zaninetti

University of Turin, Italy

Table of Contents

Volume 11 Number 3

July 2025

Quantum Klein-Gordon Equation of a Bosonic Particle in an Expanding Volume: CMB Photon Predicts the Age of the Universe (76.4 Gy) and the Observed Age (13.8 Gy) with Special Relativity

J. Perron.....701

Elektrogravity Structure of a Particle

R. Majkic714

Part II. How a Tokamak May Allow GW to Be Duplicated in Simulated Values, with Torsion Cosmology and Quantum Number n , and Cosmological Constant from Relic Black Holes

A. W. Beckwith.....737

Temperature and Time in Quantum Wave Entropy

X. L. Li784

A Resolution to the Cosmological Constant Problem: Reconsidering the Gravitational Role of Vacuum Energy

R. Van Nieuwenhove795

Optimizing the Matrix Element Method with Deep Neural Networks for High-Energy Physics Analyses

O. A. Olaiya.....802

Quasi-Equilibrium Statistical Mechanics of Cosmological Systems in the Presence of Negative Temperatures

N. N. Fimin815

On the Possible Existence of Superluminal P and S Waves within the Quantum Vacuum, and a Resolution to the Entanglement Problem

C. Pilot.....827

A Quantum Entangled Fractal Superfluid Universe

O. Ziep850

An Analytical Serendipity-Based Technique for Solving the Canonical Riccati Equation

L. Melendez-Lugo.....869

Classical Cosmology V. The Average Absolute Magnitude of Galaxies versus Redshift

L. Zaninetti.....878

Bell's Inequality and Quantum Gravity: On the Incompleteness of Quantum Mechanics and General Relativity

X. Z. Wu889

Hexagonal Structural Warp Driven Spacecraft: Metamaterials of Alconi-CrAlconi Plates Absorption Negative Matters Casimir Energy from Vacuum

H.-T. H. Su, P.-H. Lee914

Why Has the Controlled Thermonuclear Reaction Not Succeeded So Far?

Q. H. Peng, J. J. Liu932

Subquantum Processes as the True Cause of the Canonical Distribution and the Entropy

V. A. Skrebnev, M. V. Polski938

Reinterpreting the Chiral Anomaly through Subquantum Resonant Oscillations: An NMSI-Based Reformulation

S. V. Lazarev943

Resolving the Proton Spin Crisis and Radius Puzzle: A Novel Mushroom-Shaped Proton Model

N. Butto951

A Resolution to the Vacuum Catastrophe: The Role of the Omniom Vacuum

N. Butto973

Reconstructing Quantum Mechanics: A Vortex-Based Replacement for Schrödinger's Equation

N. Butto995

A Dark Energy Hypothesis VII

J. Togeas1025

Compact Non-Linear Gravitomagnetic Fields as Dark Matter

S. Marongwe, P. Bouchard1031

Limits on Application of the Formula for Potential Energy of a Hydrogen Atom and a Previously Unknown Formula

K. Suto1039

Development of a Graphene-Axion System via the K-Shell Transition of Aluminum: A Stabilization Mechanism for Graviton Emission in the Higgs Fields

H.-T. H. Su, P.-H. Lee1052

The Essence and Nature of the Speed of Light: A Fundamental Constant Emerging from Vacuum Structure

N. Butto1064

A Possible Solution of the Renormalization Paradox: From the Hypothesis of "Structure-Particle" to the Higgs Boson Mass Passing through a Finite Lattice of Propagators at Non-Divergent Integration

G. Guido1077

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
