Editor-in-Chief

Prof. Christian Corda

SUNY Polytechnic Institute, Italy

Editorial Board

Prof. Mohamed Assaad Abdel-Raouf

Ain Shams University, Egypt

Dr. Kazuharu Bamba

Fukushima University, Japan

Prof. Elmo Benedetto

University of Salerno, Italy

Prof. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety, Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Azarbaijan Shahid Madani University, Iran

Prof. Octavio José Obregón Díaz

Universidad de Guanajuato, Mexico

Prof. Shihai Dong

Instituto Politécnico Nacional, Mexico

Dr. Luca Fabbri

University of Genova, Italy

Dr. Maria Emília Xavier Guimarães

Fluminense Federal University, Brazil

Prof. Seyed Hossein Hendi

Shiraz University, Iran

Dr. Huda E. Khalid

Telafer University, Iraq

Prof. Maria Paola Lombardo

Istituto Nazionale di Fisica Nucleare, Italy

Prof. Lino Miramonti

Università degli Studi di Milano, Italy

Dr. Hooman Moradpour

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jean Perron

University of Québec in Chicoutimi, Canada

Prof. Christopher Pilot

Gonzaga University, USA

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation, State
University of Campinas (UNICAMP), Brazil

Dr. Matteo Luca Ruggiero

Università degli Studi di Torino, Italy

Prof. Jafar Sadeghi

University of Mazandaran, Iran

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathemaics & Information
Sciences, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Andrew Walcott Beckwith

Chongqing University, China

Dr. Lorenzo Zaninetti

University of Turin, Italy

Table of Contents

Volume 11 Number 4

October 2025

A Model of the Quantum Origin of the Universe from a Quantized-Velocity Space:

A Combination of the Primordial Particle Hypothesis and Quantum Gravity

S. Spremo 1215

Evidence for a Second Neutral Pion

W. A. Perkins 1224

**A Demonstration That an Electron Consists of a Ring Vortex Pair,
with Greater than 7 Sigma Statistical Support, alongside an
Explanation of Electromagnetism**

P. Newberry 1239

**One Single Metric Model's Unifying Perspective on Four Issues with Galactic Dynamics:
B-TF Relation, Rotation Curves, Spirals and SMBH-Growth**

E. P. J. de Haas 1252

Force Acting on the Photon. Elementary Theory and Astrophysical Implications

G. A. Saiyan 1265

A General Analytical Solution to the Nonlinear Riccati Differential Equation

L. Meléndez-Lugo 1285

**The Correspondence between the Vortical Prequantum Model of Baryon
and the Constituent Quark Model, Related to Their Magnetic Moments**

M. Arghirescu 1294

**The Geometry of Anti-Causal Spacetime: Photon-Tachyon Duality, Complex Curvature,
and a Time-Symmetric Cosmological Framework**

P. D. Swartz 1311

A Test of $f(Q,C)$ Gravity Model with Application to the Photometric Maximum

L. Zaninetti 1333

Electromagnetic Radiation from the Antimatter Universe: A Kerr Metric Approach

T. M. El-Sherbini 1352

A Dark Energy Hypothesis VIII

J. Togeas 1364

Higgs Mechanism, Elementary Particles and Quantum Foundations: A Geometrical Connection

L. Chiatti..... 1374

Those MOJAVE Samples That Are Sufficient to Change the Research Direction of Quasars

Y. B. Yang..... 1418

The Unification of the Four Fundamental Interactions

Y. Liu, Z. Liu, S. Yan, Z. Y. Liu 1428

A Kaluza Klein Treatment of a Graviton and Deceleration Parameter $q(z)$ as an Alternative to Standard DE and Its Possible Link to Standard DE Equation of State

A. W. Beckwith..... 1462

The Hyperflower: Strange Attractors in Complex Hilbert Space Cosmology

P. D. Swartz..... 1471

Magnetism in the World-Universe Cosmology

V. S. Netchitailo..... 1492

Hubble Parameter Evolution in the 4DEU Framework: No Need for Dark Energy and Implications for the Hubble Tension

D. Maglione..... 1499

The True Nature of Dark Matter—Elucidated by Reexamining the Interpretation of Triplet Production

K. Suto 1516

Dark Energy from Quintessence Scalar Field in Hybrid Cosmology within $f(T)$ Theory of Gravity

C. R. Tefo, K. P. Mathos, G. I. Salako, G. M. Ganiou, C. Houedokou, M. J. S. Houndjo 1533

Estimating the Effective Age of the Universe under Time Dilation: ~45 Gyr

J. Hossain..... 1545

Ion Acceleration and Plasma Jet Formation, Amplification of a Whistler Pulse along a Magnetic Field, Interaction of a Relativistic Electron Beam with a Plasma: Eulerian Vlasov Codes for Laboratory and Space Plasmas Simulation

M. Shoucri..... 1566

The Role of the Hubble Parameter in Galactic Rotation Curves and Spiral Morphology

E. P. J. de Haas..... 1595

Unravelling the Proton Mass Puzzle: A Novel Approach through Quark Vortex Dynamics and the Mushroom Model

N. Butto 1613

<https://www.scirp.org/journal/jhepgc>

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
