

## Special Issue on Security and Cryptography

### Call for Papers

Cryptography is the practice and study of techniques for secure communication in the presence of third parties called adversaries. More generally, cryptography is about constructing and analyzing protocols that prevent third parties or the public from reading private messages; various aspects in information security such as data confidentiality, data integrity, authentication, and non-repudiation are central to modern cryptography.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Security and Cryptography**. Potential topics include, but are not limited to:

- Cryptography and coding theory
- Information security
- Data confidentiality
- Security protocols
- Authentication technologies
- Communications security
- Encryption and cryptanalysis
- Cryptographic algorithms
- Digital rights management
- Key management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Security and Cryptography**” should be chosen during your submission.

According to the following timetable:

|                     |                |
|---------------------|----------------|
| Submission Deadline | May 14th, 2019 |
| Publication Date    | July 2019      |

For publishing inquiries, please feel free to contact the Editorial Assistant at [submission.entrance1@scirp.org](mailto:submission.entrance1@scirp.org)
