Volume 10 Number 1

February 2020

A Clustering Method to Solve Backward Stochastic Differential Equations with Jumps	
L. L. Zhang.....	1
Optimal Portfolio Management When Stocks Are Driven by Mean Reverting Processes	
L. J. Mbigili, S. Mataramvura, W. M. Charles.....	10
Application of G-Brown Motion in the Stock Price	
C. K. Chai.....	27
Jensen Inequality of Bivariate Function in the G-Expectation Framework	
L. Y. Feng.....	35
Alternative Financing Instruments for African Economies	
J. Mpapalika.....	42
The Relationship Structure of Global Exchange Rate Based on Network Analysis	
H. D. Cao, Z. R. Guo, Y. Li, Z. Z. Ran.....	58
The Impact of Cost Reduction on Price Matching Strategy in the Presence of Hybrid Consumers	
X. L. Ye, Z. Z. Guan, M. Ouyang.....	77
Pricing and Capability Planning of the Referral System Considering Medical Quality and Delay-Sensitive Patients—Based on the Chinese Medical System	
Z. Z. Guan, H. Z. Chen, N. Zhao, A. F. Zhang.....	96
Bitcoin Price Prediction Based on Deep Learning Methods	
X. X. Jiang.....	132
The Barrier Binary Options	
M. Gao, Z. F. Wei.....	140
Optimal Entry and Exit Strategy under Uncertainty with Stochastic Volatility	
J. W. Huang.....	157
Malliavin Differentiability of CEV-Type Heston Model	
S. Tsumurai.....	173
The Risk in the Insurance Field: A Generalized Analysis	
R. Ferrentino, L. Vota.....	200
