

Special Issue on Metallurgy and Materials

Call for Papers

Metallurgy is a domain of materials science and of materials engineering that studies the physical and chemical behavior of metallic elements and their mixtures, which are called alloys. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Metallurgy and Materials**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Metallurgy and Materials**. In this special issue, potential topics include, but are not limited to:

- Iron and steel metallurgy
- Nonferrous metal metallurgy
- Metallurgical physical chemistry
- Physical and mechanical properties
- Metallurgical process simulation
- Hydrometallurgy and powder engineering
- Applications of nonferrous functional materials
- Metal materials and heat treatment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Metallurgy and Materials**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 10th, 2025
Publication Date	June 2025

Guest Editor:

Dr. Dayanand.M.Goudar, Tontadarya College of Engineering, India.
