

Special Issue on Material Preparation and Characterization

Call for Papers

The field of molecular materials research looks at the preparation and characterization of potentially useful materials with enhanced physical, chemical, and biomedical properties. This special issue explores multiple aspects of molecular materials, including their synthesis and characterization, and gives information on their application in various fields. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **material preparation and characterization**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **material preparation and characterization**. In this special issue, potential topics include, but are not limited to:

- Characterization techniques
- Preparation, characterization, properties of metals & alloys
- Preparation, characterization, properties of ceramics
- Preparation, characterization, properties of nanomaterials
- Preparation, characterization, properties of biomedical materials
- Preparation, characterization, properties of optical materials
- Preparation, characterization, properties of composites

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Material Preparation and Characterization**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 27th, 2026
Publication Date	October 2026
