

Special Issue on Theoretical Physics

Call for Papers

Theoretical Physics is a branch of physics that employs mathematical models and theoretical frameworks to understand and predict physical phenomena. It involves developing and analyzing theories that describe the fundamental forces and particles of nature, as well as their interactions and behaviors. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Theoretical Physics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Theoretical Physics**. In this special issue, potential topics include, but are not limited to:

- Particle Physics
- Quantum Physics
- Relativistic Physics
- Statistical Physics
- Cosmology
- Condensed Matter & Statistical Physics
- Quantum Information & Foundations
- Mathematical Physics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Theoretical Physics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 28th, 2026
Publication Date	January 2027
