Table of Contents

Volume 14 Number 3

March 2026

The Synergy of Indigenous Vegetables and Bioenergy for Nutritious Food Sovereignty in Tanzania and Beyond: A Systematic Review

Y. M. Yustas, H. A. Mbwana 1

Optimisation of Wireless Energy Transmission by Resonant Magnetic Coupling

B. Taguia Kana, E. Tchoffo Houdji, J. L. Nsouandele, A. Yeremou Tamtsia 27

Two-Stage Virtual Power Plant Bi-Level Hybrid Game Model Considering Photovoltaic Uncertainty under Blockchain Technology

J. H. Xu, J. X. Li, Y. L. Li 53

Enhancing Transmission Efficiency through Series Compensation: A Case Study Perspective

N. K. Fiasorgbor 84

Coordinated Low-Carbon Demand Response of Customer Directrix Load with Cross-Elastic Incentives

Q. B. Luo, D. Han 102

Fabrication and Experimental Investigation of a Solar Flat Plate Domestic Water Heater Performance and Efficiency in Bambili, Cameroon

J. N. Mungwe, D. A. Asoh, N. H. Alombah, F. D. Njodzela 121

Techno-Economic Evaluation of a PV-Biomass-Diesel Hybrid Systems with Electric Heating and Thermal Heat Storage (TES) for Isolated Power Grids: Case Study; the 5 MW Mamfe Diesel Thermal Power Plant, Southwest Region of Cameroon

E. K. Ayamba, W. Elvis, T. Pierre 142

Journal of Power and Energy Engineering

ISSN Print: 2327-588X ISSN Online: 2327-5901

<https://www.scirp.org/journal/jpee>

Journal of Power and Energy Engineering (JPEE) is an international journal dedicated to the latest advancements in power and energy engineering. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of power and energy engineering.

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

1. Power Generation-Conventional and Renewable

Bio-energy technologies, process and utilization
Environmentally-friendly technologies for power generation
Geothermal and tidal wave energy
Hydropower technologies and applications
New technologies and design for energy efficiency
New technologies for minimizing CO₂ generation
Photovoltaics for solar power applications
Safe nuclear energy generation and utilization
Thermal power technologies and applications
Waste products as fuel
Wind power generation and utilization
Advanced energy and power devices
Other sustainable energy

2. Power System Management

Application of wide area measurement system (WAMS)
Control strategies for modern power system stability
Integrated substation automation technologies
Load modeling, estimation and forecast
Modeling and simulation of large power systems
Online monitoring and fault diagnosis system
Power system analysis and optimization
Power system management technologies

Power system monitoring and mitigation technologies

Power system planning and operation

3. Power Transmission and Distribution

Advanced distribution and SCADA technologies
Electromagnetic analysis in power systems
Electromagnetic compatibility in power systems
Electromagnetic transient in high voltage power systems
HVDC and flexible AC transmission system (FACTS)
Insulation condition monitoring in power systems
Over-voltage, lightning protection and grounding
Plasma physics and the pulsed power technology
Ultra high voltage (UHV) technologies

4. Smart Grid Technologies

Agent-based computational economics for grid
Agent-based mechanisms for grid markets
Agent-based simulation of grid environments and markets
Automated negotiation for grid resource allocation
Engineering of grid markets and grid architectures
Modeling of grid environments
Resource allocation in grid scenarios using agent-based approaches
Technical research on future application domains

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors

The submitted manuscript should not have been previously published in any form and must not be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All paper are refereed through a peer process. For more details about the submissions, please access the website.
