

Special Issue on Information Systems and Computing

Call for Papers

Information Systems and Computing explores the design, development, management, and application of information technologies and computing systems. It covers information systems, software development, databases, data analytics, cloud computing, artificial intelligence, cybersecurity and digital transformation. The topic also examines how computing technologies support organizational processes, decision-making, innovation and the development of efficient and intelligent digital solutions across various industries.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information Systems and Computing**. Potential topics include, but are not limited to:

- Information Systems Design and Management
- Software Engineering and Development
- Database Systems and Data Management
- Management Information System
- Artificial Intelligence and Machine Learning
- Data Science and Analytics
- Cloud Computing and Distributed Systems
- Cybersecurity and Information Privacy
- Human-Computer Interaction
- Information Systems and Decision Sciences
- Computer Networks and Communication Systems
- Digital Transformation and Emerging Technologies

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Information Systems and Computing**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 21st, 2026
