

Special Issue on Feminism and Equality

Call for Papers

Feminism is a social movement that crosses the boundaries of class and race. The term "feminists" first appeared in the form of French, which was created by Charles Fourier, a French utopian socialist. Feminism is not just a simple ideology now. In fact, feminism has formed many schools. Generally speaking, feminist theory can be divided into micro theory and macro theory, of which the emphasis is to achieve equality between men and women. Due to the emergence and development of feminist thought, women's rights have been protected, and the dignity of women has been recognized by the society. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of feminist thought.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **feminism and equality**. Potential topics include, but are not limited to:

- Feminism and patriarchy
- Feminist epistemology
- Eco-feminism
- Feminist standpoint theory
- Feminist empiricism
- Postmodern feminism
- The significance of feminist literature
- The influence of feminism on social development

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Feminism and Equality***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 14th, 2018
Publication Date	August 2018
