

Special Issue on Technology and Society

Call for Papers

Technology and Society explores the complex interactions between technological innovation and the social, cultural, political, and economic contexts in which it develops and operates. This theme addresses how technologies—from digital communication and artificial intelligence to biotechnology and renewable energy—transform human behavior, reshape institutions, and influence global challenges such as sustainability, inequality, governance, and security. It also considers ethical issues, public perceptions, and the broader implications of emerging technologies for social justice and human well-being. By integrating perspectives from science, engineering, social sciences, and humanities, this area provides critical insights into how technology both shapes and is shaped by society in the modern world.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Technology and Society**. Potential topics include, but are not limited to:

- Artificial intelligence and society
- Biotechnology and society
- Digital society
- History of technology
- Human-computer interaction and society
- Philosophy of technology
- Sociology of technology
- Surveillance and privacy
- Sustainable technology
- Technology and culture
- Technology and education
- Technology and ethics
- Technology and governance
- Technology and media
- Technology and public policy
- Technology and social justice

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Technology and Society***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 30th, 2025
Publication Date	February 2026

Guest Editor:

Prof. Wael BADAWY

Advanced Computer Studies, University of Louisiana at Lafayette, USA
