

Special Issue on Sustainable Circular Economy

Call for Papers

Sustainable Circular Economy promotes the efficient use of resources through strategies that minimize waste, extend product life cycles, and regenerate natural systems while supporting long-term economic, environmental, and social sustainability. The field examines circular production and consumption models, resource recovery, recycling, remanufacturing, eco-design, industrial symbiosis, and sustainable supply chains to reduce environmental impacts and improve resource efficiency. By integrating principles from environmental science, engineering, economics, business, and public policy, it advances innovative solutions that foster resilient economies, reduce carbon emissions, conserve natural resources, and support sustainable development.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Sustainable Circular Economy**. Potential topics include, but are not limited to:

- Circular economy strategies
- Resource efficiency
- Waste management and recycling
- Industrial symbiosis
- Sustainable production systems
- Green supply chain management
- Eco-design and product lifecycle
- Remanufacturing and refurbishment
- Materials recovery and reuse
- Renewable resources and bioeconomy
- Life cycle assessment
- Environmental policy and governance
- Sustainable consumption
- Carbon management and decarbonization
- Circular business models
- Sustainable resource management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sustainable Circular Economy**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 30th, 2026
Publication Date	January 2027
