Special Issue on Science and Technology

Call for Papers

Science and Technology is a broad field dedicated to advancing scientific knowledge and developing technological innovations that address practical challenges and improve quality of life. It includes fundamental scientific research, applied sciences, engineering, digital technologies, materials science, biotechnology, information systems, and emerging technological applications. Research in this area contributes to industrial development, economic growth, environmental protection, healthcare improvement, and the modernization of social infrastructure. By promoting scientific discovery, technological innovation, and interdisciplinary collaboration, this field supports the development of effective solutions to contemporary challenges and creates new opportunities for sustainable development and global progress.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Science and Technology**. Potential topics include, but are not limited to:

- Basic sciences
- Applied sciences
- Engineering technology
- Information technology
- Artificial intelligence
- Materials science
- Biotechnology
- Environmental technology
- Nanotechnology
- Robotics and automation
- Energy technology
- Communication technology
- Medical technology
- Manufacturing technology
- Space technology
- Scientific instrumentation

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.
