

Special Issue on Transportation Engineering and Management

Call for Papers

Transportation Engineering and Management encompasses the planning, design, operation, and management of transportation systems to improve mobility, safety, efficiency, and sustainability. It covers topics such as traffic engineering, intelligent transportation systems, transportation planning, highway and pavement engineering, public transportation, logistics, freight transportation, transportation infrastructure, traffic safety, transportation policy, and sustainable mobility. The field integrates civil engineering, data analytics, operations research, and urban planning to optimize transportation networks, enhance infrastructure performance, reduce environmental impacts, and support the development of safe, resilient, and efficient transportation systems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Transportation Engineering and Management**. Potential topics include, but are not limited to:

- Transportation planning
- Traffic engineering
- Intelligent transportation systems
- Highway engineering
- Pavement engineering
- Public transportation
- Freight transportation
- Transportation infrastructure
- Traffic safety
- Transportation logistics
- Urban transportation
- Sustainable mobility
- Transportation economics
- Traffic flow analysis
- Transportation policy
- Infrastructure asset management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Transportation Engineering and Management***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 30th, 2026
Publication Date	December 2026

Guest Editor:

Dr. Kaveh Ostad-Ali-Askari

Department of Civil Engineering, Stanford University, USA
