Modeling and Numerical Simulation of Material Science (MNSMS) is an international peer-reviewed, open access journal publishing in English original research studies, reviews and case reports in all aspects of Material Science.

Honorary Editor-in-Chief

Prof. Kiet Tieu University of Wollongong, Australia

Executive Editor-in-Chief

Prof. Hailiang Yu Central South University, China

Subject Coverage

All the manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copies. The journal publishes original papers including but not limited to the following fields:

- | | | |
|---|---|--------------------------------|
| •Application of Modeling and Numerical Simulation Methods | •Ceramic Materials | •Molecular Dynamics (MD) |
| •Artificial Intelligence Method | •Composites | •Non-Ferrous Metals and Alloys |
| •Biomaterials | •Crystal Plasticity Finite Element Method | •Polymer |
| •Boundary Element Method | •Ferrous Metals and Alloys | •Slab Method |
| •Carbons | •Finite Difference Method | •Statistical Methods |
| •Cellular Automaton (CA) | •Finite Element Method | •Other Advanced Materials |

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
